your perfect fit, every time!

*unique fit and support, that brings
style and comfort to life.*

reverse sandals and shoes have been designed uniquely for you. We know that no two feet are the same, so with help and guidance from foot health experts we have created a fitting system that enables you to personalise the fit of your reverse sandals and shoes to create more adjustability through the use of our innovative Strap Extensions.

Our Strap Extensions are low-profile and discreet and are included in the box with every pair of shoes, allowing you to customise the length of any strap without sacrificing style.

For those with narrow feet, many of our sandals feature trim marks on the straps. This is the ideal solution to shorten the length of a strap if required, to enhance the look and feel of our upper designs.

for a fit as unique as you

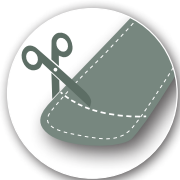

Now that you've found the perfect shoes, let the revere Fit Kit help you find your perfect fit.

strap extenders

need more width?

It's simple - attach the Strap Extenders to the end of any strap to add an extra 0.59" or 15mm of adjustability if needed.

strap trim marks

too much strap?

if you find your sandal straps have too much overhang, you can trim them by cutting just forward of the trim mark line.

forefoot cushioning

did someone say cushioning?

Our supportive contoured footbed is cushioned for all day comfort. A perfectly positioned metatarsal raise in the forefoot helps to reduce that nasty burning sensation under the ball of foot.

removable comfort footbed

our footbed or yours?

With superior arch support, our contoured footbeds stabilise & cushion your feet, or alternatively you can fit your own orthotics into our stylish sandals.

Or rejuvenate your sandals with our replacement insoles.
